

Finance Administration Department

ORDA Ethiopia utilizes its finance and other resources responsibly and for the intended purpose through putting in place effective financial system. This is coherent with its procurement and human resource management manuals. The financial management is simplified, adequately decentralized, and completed with full and special delegations.

Apart from this, the financial system is computerized, and works with Local Area Network (LAN) facility. This arrangement grants access to all responsible for the management and administration of finance in the organizations while they are in their respective offices. Accredited auditors do regular audits and they are always happy with the quality and efficiency of the system. This financial system is well recognized by all stakeholders and it is well accepted by its donors. Also, ORDA Ethiopia financial reports are equally shared with relevant stakeholders.

According to the Ethiopian Charities and Societies Proclamation number 621/2009 the organization commissions external audit firm to audit its financial source documents to report the audit finding to the ORDA Ethiopia Annual General Assembly.
